

DATA LINE SPDs

- Data line surge protectors are designed to protect signal line, communication line or telephone line, DC line by limit the voltage supplied either by blocking or by shorting to ground
- For different types of surges like direct lightning, indirect lightning, induced lightning and switching surge there are different types and ranges of data line SPDs are available with INE
- Based on IEEE or VDE classification we need to select proper SPDs for different zone of protection
- For various connecting port like RJ11, RJ45, Serial Port(RS232) etc. various data line SPDs are available and those are serial connection type
- Data line SPDs are classified under Class D or CAT A type device use on point-of-entry like power outlet and distributed circuit.

**SURGEBOX DC/PHONE/
DATA LINE**
